EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in an electronic communication with Rashida Karmali on 1 February 2006.

The application has been amended as follows:

Cancel claims 1-27

Add new claim 28 as follows:

Claim 28 (new). A method of performing clinical diagnosis of Hepatitis B, comprising:

- a) submitting patient tests ordered by a physician to a clinical lab;
- b) selecting a Hepatitis B specific algorithm for tests necessary for clinical chemical analysis of Hepatitis B or any one of subgroups thereof;
- c) classifying the various subgroups of Hepatitis B, said classification based on pathology, pathogenic agent, cause and symptoms;
- d) defining a first set of relevant clinical tests suitable for diagnosing each of the subgroups of Hepatitis B classified in c), wherein the tests comprise HBsAg, HBsAb, and SGPT;
- e) carrying out only the relevant tests defined in d) to obtain at least one clinical test value followed by determination of a second set of relevant clinical tests;

Art Unit: 1631

f) sequentially running the second set of clinical tests for each of the subgroups of Hepatitis B upon receiving a first set of said clinical test values, and computing a second set of clinical test values;

g) repeating steps e) and f) with additional relevant clinical tests until a confirmed diagnosis of Hepatitis B and subgroup is provided.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The closest prior art of Armstrong et al. (US 6,099,469) and Adalassnig et al. (Artificial Intelligence in Medicine (1995) Vol. 7, pages 1-24) does not teach or fairly suggest a method of clinical diagnosis of Hepatitis B, wherein relevant tests are defined to be HBsAg, HbsAb, and SGPT, and the method requires that only the relevant tests are performed, followed by a sequential running of a second set of tests.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
